WELCOME TO USBT

USD SPLITER & BOT TRADE

Bots are automated computer programs designed to run specific tasks with non human intervention. In the world of cryptocurrency trading, crypto trading bots do the work of trading either one or multiple cryptocurrencies on multiple platforms automatically on behalf of the user or community.

They are used to automate trading strategies and applied for purposes of amplifying trading profits.

NO ADMIN NO CEO | SMART CONTRACT BASED

100% SAFE

About USBT

A truly decentralized Smart Contract based never ending lifetime earning opportunity.

USBT works through a smart contract that is verified and deployed upon Binance Smartchain.
Once deployed no one can stop, alter, modify or delete it. It will run until community wants
 it to run. All players will get their cycle awards for the lifetime.
